Cisco SPA942 4-Line IP Phone with 2-Port Switch Cisco Small Business IP Phones

Advanced, Feature-Rich, Multiline IP Phone for SIP-Based VoIP Service

Highlights

- Industry-leading VoIP technology from Cisco that delivers a high-quality IP phone that is unparalleled in features, value, and support.
- Standard features include four active lines, dual-switched Ethernet ports, Power over Ethernet, a high-resolution graphical display, full-duplex speakerphone, and a headset port
- Business-grade reliability with advanced voice quality of service
- Comprehensive interoperability with the Cisco[®] Small Business SPA9000 Voice System, SIP-based phone systems, and SIP phone services from your Internet telephony service provider

Figure 1. Cisco SPA942 4-Line IP Phone with 2-Port Switch

Product Overview

Stylish and functional in design, the Cisco SPA942 4-Line IP Phone with 2-Port Switch (Figure 1) is ideal for a residence or business using a hosted IP telephony service, an IP private branch exchange (PBX), or a large-scale IP Centrex deployment. The Cisco SPA942 uses industry-leading voice over IP (VoIP) technology from Cisco to deliver an upgradeable high-quality IP phone that is unparalleled in features, value, and support.

Based on the Session Initiation Protocol (SIP), the Cisco SPA942 has been tested to ensure comprehensive interoperability with equipment from VoIP infrastructure leaders, enabling service providers to quickly roll out competitive, feature-rich services to their customers.

With hundreds of features and configurable service parameters, the Cisco SPA942 addresses the requirements of traditional business users while taking advantage of the benefits of IP telephony.

Features such as easy station moves and shared line appearances (across local and geographically dispersed locations) are just some of the many advantages.

Standard features on the Cisco SPA942 include four active lines, dual-switched Ethernet ports, 802.3af Power over Ethernet (PoE)* support, a high-resolution graphical display, full-duplex speakerphone, and a 2.5-mm headset port. Each line can be independently configured to use a unique phone number (or extension), or can use a shared number that is assigned to multiple phones.

The Cisco SPA942 uses standard encryption protocols to provide secure remote provisioning and unobtrusive in-service software upgrades. Highly secure remote provisioning tools include detailed performance measurement and troubleshooting features, enabling network providers to deliver high-quality support to their subscribers. Remote provisioning also saves service providers the hassle and expense of managing, preloading, and reconfiguring customer premises equipment (CPE).

*The power supply for the SPA942 is sold separately and is required if PoE capability is not implemented.

Features

- · Up to four lines with independent configuration and registration
- · Active line indication, with name and number
- · Menu-driven user interface, with support for multiple languages
- · Digits dialed with number auto-completion
- Shared line appearance**
- Full-duplex speakerphone
- Call hold
- Music on hold**
- Call waiting
- Caller ID name and number
- Outbound caller ID blocking
- Call transfer attended and blind
- Call conferencing
- Automatic redial
- On-hook dialing
- Call pickup selective and group**
- Call park and retrieval**
- Call swap
- Call back on busy
- Call blocking anonymous and selective
- · Call forwarding unconditional, no answer, or busy
- Hot line and warm line automatic calling
- · Call logs (60 entries each) calls made, answered, and missed
- Redial from call logs
- · Personal directory with auto-dial (100 entries)

- Do not disturb (callers hear busy signal)
- Uniform Resource Identifier (URI) (IP) dialing support (vanity numbers)
- On-hook default audio configuration (speakerphone and headset)
- Multiple ring tones with selectable ring tone per line
- Called number with directory name matching
- Call number using name directory matching or via caller ID
- Subsequent incoming calls with calling name and number
- Date and time with intelligent daylight savings support
- Call duration and start time stored in call logs
- Call timer
- · Name and identity (text) displayed at startup
- · Distinctive ringing based on calling and called number
- Speed dialing
- Configurable dial/numbering plan support (per line)
- Intercom** and group paging**
- DNS SRV and multiple A records for proxy lookup and proxy redundancy
- Syslog and debug server records (configurable per line)
- Report generation and event logging
- Statistics transmitted in BYE message
- Secure call encrypted voice communication support SIP over Transport Layer Security (TLS), and Secure Real-Time Transport Protocol (SRTP)
- · Built-in web server for administration and configuration with multiple security levels
- Automated provisioning, multiple methods up to 256 bit encryption (HTTP, HTTPS, Trivial File Transfer Protocol [TFTP])
- · Asynchronous notification of upgrade availability via NOTIFY
- Nonintrusive, in-service upgrades
- · Optionally require administrator password to reset unit to factory defaults

** Feature requires support by SIP server

Specifications

Table 1 contains the specifications, package contents, and documentation for the Cisco SPA942 4-Line IP Phone with 2-Port Switch. Table 2 compares the SPA942 with other Cisco Small Business IP Phones.

Table 1. Specifications for the Cisco SPA942 4-Line IP Phone with 2-Port Switch

Voice

- SIP version 2 (RFC 3261, 3262, 3263, 3264)
- SIP proxy redundancy dynamic via DNS SRV, A records
- Re-registration with primary SIP proxy server
- SIP support in NAT networks NAT (including serial tunnel [STUN])
- SIPFrag (RFC 3420)
- Secure (encrypted) calling via SRTP (RFC 3711)
- Codec name assignment
- Voice algorithms: G.711 (A-law and μ-law), G.726 (16/24/32/40 kbps), G.729 A, G.723.1 (6.3 kbps, 5.3 kbps)
- Dynamic payload support
- Adjustable audio frames per packet
- Dual-tone multifrequency (DTMF) in-band and out-of-band (RFC 2833) (SIP INFO)
- Flexible dial plan support interdigit timers
- IP address/URI dialing support
- Call progress tone generation
- Jitter buffer adaptive
- Frame loss concealment
- VAD voice activity detection with silence suppression
- Attenuation/gain adjustments
- MWI message waiting indicator tones
- VMWI voicemail waiting indicator via NOTIFY, SUBSCRIBE
- Caller ID support (name and number)
- Third-party call control (RFC 3725)

Security

- Password-protected system, preset to factory default
- Password-protected access to administrator and user-level features
- HTTPS with factory-installed client certificate
- HTTP digest encrypted authentication via MD5 (RFC 1321)
- Up to 256-bit Advanced Encryption Standard (AES) encryption

Cisco Limited Warranty for Cisco Small Business Series Products

This Cisco Small Business product comes with a 1-year limited hardware warranty with return to factory replacement and a 90-day limited software warranty. In addition, Cisco offers software application updates for bug fixes and telephone technical support at no charge for the first 12 months following the date of purchase. To download software updates, go to: http://www.cisco.com/go/smallbiz.

Product warranty terms and other information applicable to Cisco products are available at <u>http://www.cisco.com/go/warranty</u>.
