

The Power of We™

IP Office Server Edition

Seamless Growth, Simple Management and Reduced TCO for Midsize businesses

Overview

IP Office *Server Edition* is the ideal solution for midsize businesses, delivering intelligent Unified Communications, scalable growth and seamless management. *Server Edition* enables businesses to quickly and easily add users to an existing office or even connect a remote office, all from the central HQ. A Linux server is the heart of *Server Edition*, running IP Office software, Voice Messaging and Unified Communications (Avaya one-X® Portal for IP Office). *Server Edition* delivers true Centralized Management and Licensing for *all* users, across *all* locations, in one, intuitive, Graphical User Interface.

IP Office *Server Edition* enhances the capabilities of *Preferred Edition* ... and more!

Capabilities

- **Expanded scale/capacity With a Linux server** - *Server Edition* means seamless growth, ... up from 384 users to 1000 per site; and 40 voice messaging ports to 100 all using the same Linux Server
- **Centralized Management** - Simple administration is the cornerstone of *Server Edition*. From the one intuitive interface, the System Administrator has one view of all users on a single site or across up to 32 locations. Using system status can, at a glance, let the Administrator know of any potential issues that could affect system performance such as over utilized trunk lines, voice ports, and bandwidth utilization
- **Centralized Licensing** - *Server Edition* holds all common licenses centrally, making it cost effective to purchase discounted license packs and easy for a System Administrator to assign user solutions to employees anywhere within the network
- **Resilience built-in** - midsize businesses demand reliability, *Server Edition* delivers. Within a multi-site

network where *Server Edition* is deployed across remote locations, in the unlikely event of a system outage, the IP Phones on that location simply re-register to an alternate location. Voice messaging is also critical to many businesses; *Server Edition* backs-up messages and greetings to an alternate Linux server.

Benefits

- **Cost effective growth** - whether it's adding a user or a location, *Server Edition* easily grows with any expanding company
- **Low TCO** - Day to day administration of users, groups and call routing across the entire network is easy from the centralized, Graphical User Interface, speeding Moves, Adds and Changes (MAC's)
- **Non-stop communications** the failover capabilities of *Server Edition* for both real time and voice messaging helps assure that businesses don't miss a beat

About Avaya
